1 Plaintiff FINISAR CORPORATION ("Finisar") alleges as follows:

2 **PARTIES**

3 1. Plaintiff Finisar is a Delaware corporation with its principal place of business at  
4 1389 Moffett Park Drive, Sunnyvale, California 94089-1134. Finisar is qualified and duly  
5 authorized to conduct business in the State of California.

6 2. Defendant Oplink Communications Inc. ("Oplink") is a Delaware corporation  
7 doing business in this judicial district, and has a principal place of business at 46335 Landing  
8 Parkway, Fremont, California 94538.

9 3. On information and belief, Defendant Optical Communication Products, Inc.  
10 ("OCP") is a Delaware corporation doing business in this judicial district, and has a principal  
11 place of business at 46335 Landing Parkway, Fremont, California 94538.

12 4. On information and belief, Defendant OCP is a wholly-owned subsidiary of  
13 Oplink, and OCP's infringing business has been transferred to Oplink.

14 **JURISDICTION AND VENUE**

15 5. This is a civil action arising under the patent laws of the United States, 35 U.S.C.  
16 §§ 1 *et seq.* This Court has jurisdiction over the subject matter of this action pursuant to  
17 28 U.S.C. § 1331 and 1338(a).

18 6. Personal jurisdiction as to each defendant is proper in the State of California and in  
19 this judicial district. Defendants maintain a regular and established place of business and ongoing  
20 business activity in this State and in this judicial district, and therefore have sufficient contacts  
21 with the State of California to satisfy the requirements of due process and Rule 4(k)(2) of the

25 **INTRADISTRICT ASSIGNMENT**

26 8. Under Civil L. R. 3-2(c), this action shall be assigned on a district-wide basis,  
27 notwithstanding the fact that a substantial part of the events that give rise to the claims alleged  
28 herein occurred in Santa Clara County, in the San Jose Division of this Court.

## PROCEDURAL BACKGROUND

9. On January 5, 2010, Finisar filed a Complaint against Defendant Oplink in Case No. C-10-00032 WHA in the United States District Court for the Northern District of California raising the same allegations presented in this Complaint. By Court Order dated May 5, 2010 in that case, Oplink was severed from that case and dismissed without prejudice to Finisar's right to re-file its claims in a separate action.

## PATENTS-IN-SUIT

10. Finisar is the sole owner of U.S. Patent No. 5,019,769 (the "'769 patent'"), issued on May 28, 1991, titled "Semiconductor Laser Diode Controller and Laser Diode Biasing Control Method." **FINISAR'S OPTOELECTRONIC TRANSCEIVER TECHNOLOGY**

22. Optoelectronic transceivers are used to provide the electrical-to-optical and optical-to-electrical conversion required for modern communication over fiber optic cables. Optoelectronic transceivers are a vital component of the high-speed broadband revolution that has transformed the way consumers all over the world watch television, surf the internet, and communicate.

23. Finisar is a leading supplier of optoelectronic transceivers and invests substantially in research and development of new and innovative technologies and products. Finisar has been a pioneer in the optoelectronics industry, developing, for example, automated transceiver calibration methods and adding diagnostic intelligence to its transceivers.

24. Finisar developed the digital processor controlled laser diode calibration technology claimed in the '769 patent directed to automation of the process of selecting the drive current level of the laser diode.

25. Finisar engineers later developed an improved digital diagnostics technology claimed in the Enhanced Digital Diagnostics Patents directed to real-time monitoring of transceiver operating parameters with dramatically improved diagnostic data storage and host access capabilities, helping to identify abnormal and potentially unsafe operating conditions, simplifying maintenance, and enhancing reliability.

26. Optoelectronic high-speed networks using optoelectronic transceivers with digital diagnostic monitoring features are now in widespread use, in no small part because of the efforts of Finisar. Finisar has worked to bring its advanced technology to the entire industry not only by designing new products, but also by its participation in and commitment to working with industry committees to create standards and common specifications for transceiver digital diagnostics.

27. One such specification is the SFF-8472 specification, titled "Digital Diagnostic Monitoring Interface for Optical Transceivers," which was published by the Small Form Factor Committee. This document specifies a digital diagnostic feature set for Small Form Factor Pluggable ("SFP") transceivers. It defines an enhanced digital diagnostics monitoring interface

1 for optical transceivers which allows real-time access to device operating parameters.

2 28. The SFF-8472 specification was developed at least in part by Finisar employees  
3 and relies upon Finisar's inventions.

4 29. Industry adoption of the SFF-8472 specification was swift. SFF-8472-compliant  
5 transceivers are now widely available.

6 30. Similar digital diagnostic capabilities have been incorporated into other widely  
7 used industry multi-source agreement specifications and/or products, including but not limited to  
8 the Enhanced Small Form Factor Pluggable ("SFP+"), 10 Gigabit Small Form Factor Pluggable  
9 ("XFP"), DWDM Pluggable Transceiver ("DWDM"), XENPAK, Broadband Passive Optical  
10 Network ("BPON"), Gigabit Passive Optical Network ("GPON"), and Gigabit Ethernet Passive  
11 Optical Network ("GEPON") specifications and/or products. For example, the XFP specification  
12 states that the mandatory XFP 2-wire serial interface is "modeled largely after the digital  
13 diagnostics monitoring interface proposed for the SFP and GBIC optical transceivers and defined  
14 in SFF draft document SFF-8472 Rev 9.3 . . . ."

15 31. All of the major transceiver manufacturers, including the Defendants, make  
16 transceivers that include digital diagnostics. The widespread acceptance and use of Finisar's  
17 digital diagnostics technology by numerous standards bodies and competitors demonstrates the  
18 industry's recognition of the value and importance of Finisar's innovation.

19 32. Finisar has licensed its '769 patent and the Enhanced Digital Diagnostics Patents  
20 to other manufacturers in the industry.

21 33. Finisar has also provided notice of its '769 patent and the Enhanced Digital  
22 Diagnostics Patents portfolio, and offered licenses to this portfolio, to others in the industry,  
23 including each of the Defendants. Defendants first received notice of the '769 patent and one or  
24 more of the Enhanced Digital Diagnostics Patents on or before December 13, 2005. Defendants  
25 have refused to license Finisar's '769 patent or the Enhanced Digital Diagnostics Patents.

26 34. Finisar also recognizes the technical contributions of other companies as  
27 demonstrated by its purchase of the Optoelectronic Module Patents from Matsushita Electric  
28 Industrial Co., Ltd.

**THE ACCUSED PRODUCTS**

35. The Accused Products include, but are not limited to, Defendants' optoelectronic transceivers that (i) are calibrated under processor control pursuant to the claims of the '769 patent, including for example and without limitation, Defendants' GBIC, SFF, SFP, 1x9, 2x9, XFP, SFP+, PON OLT, and PON ONU products; (ii) are compliant with SFF-8472 or otherwise include digital diagnostics, including for example and without limitation, Defendants' SFP, XFP, and SFP+ products; and/or (iii) include the claimed features of the Optoelectronic Module Patents, including for example and without limitation, Defendants' GBIC, SFF, SFP, 1x9, 2x9, XFP, SFP+, PON OLT, and PON ONU products.

(Infringement of U.S. Patent No. 5,019,769)

36. Finisar realleges and incorporates by reference the allegations stated in paragraphs 1 through 35 of this Complaint.

37. Defendants, by engaging in the unauthorized manufacture (or causing to be manufactured), importation, use, sale and/or offer for sale of Accused Products that were covered by one or more of the claims of the '769 patent and/or that were made overseas by processes that were covered by one or more of the claims of the '769 patent on or before September 14, 2010, have committed acts of direct infringement of one or more claims of the '769 patent. These acts constitute violations of 35 U.S.C. § 271.

38. Defendants have committed acts of contributory and/or inducement of infringement of one or more claims of the '769 patent by selling, supporting, and/or encouraging infringing methods of use of the Accused Products to third parties on or before September 14, 2010, including but not limited to customers and end-users. Such optoelectronic transceivers are not staple articles or commodities suitable for non-infringing uses. On information and belief, Defendants knew or should have known of the '769 patent, at least because Finisar provided notice of the '769 patent to the Defendants prior to some or all of the sales to third parties of optoelectronic transceivers covered by one or more of the claims of the '769 patent. These acts constitute violations of 35 U.S.C. § 271.

39. On information and belief, Defendants' infringement of the '769 patent has been willful and deliberate. Despite knowing of the '769 patent, the Defendants continued to directly and indirectly infringe one or more claims of the '769 patent, entitling Finisar to increased damages under 35 U.S.C. § 284 and to attorneys' fees and expenses incurred in prosecuting this action under 35 U.S.C. § 285.

40. As a direct and proximate result of Defendants' infringement of the '769 patent, Finisar has been damaged in an amount yet to be determined.
